NAME

MARC::File::MicroLIF - MicroLIF-specific file handling

SYNOPSIS

```
use MARC::File::MicroLIF;

my $file = MARC::File::MicroLIF->in( $filename );

while ( my $marc = $file->next() ) {
    # Do something
}
$file->close();
undef $file;
```

EXPORT

None.

METHODS

header()

If the MicroLIF file has a file header then the header is returned. If the file has no header or the file has not yet been opened then `undef` is returned.

TODO

RELATED MODULES

MARC::File

LICENSE

This code may be distributed under the same terms as Perl itself.
Please note that these modules are not products of or supported by the employers of the various contributors to the code.
